

JuiceNet[®] Enterprise

Commercial Charging Software

Powerful & flexible smart grid EV charging at an affordable price

Our advanced EVSE asset management platform, JuiceNet Enterprise delivers the financial savings and flexibility you need to efficiently manage your EV charging operations. It's the perfect solution for condominiums, apartment buildings, offices, shopping malls, universities, event venues, garages, and more.

Whether your system is just getting started or you're already powering an entire fleet of vehicles, JuiceNet Enterprise is designed to help you:

- Monitor and control your charging system with a powerful online dashboard
- Reduce energy costs by controlling charging times and managing demand charges
- Generate new revenue from your charging stations
- Provide authorized and public drivers an easy way to charge
- Optimize charging times and aggregate stations to reduce energy costs using industry-leading open smart grid standards

Why JuiceNet Enterprise?

Control Station Access

Set charging times and allow authorized users to access charging

Limit and Balance Your EV Load

Expand your charging operations without expensive infrastructure upgrades

Save on Charging Expenses

Cap overall electricity consumption and manage demand charges

Generate Revenue

Collect payment through mobile app or create invoices from reports

See System Health

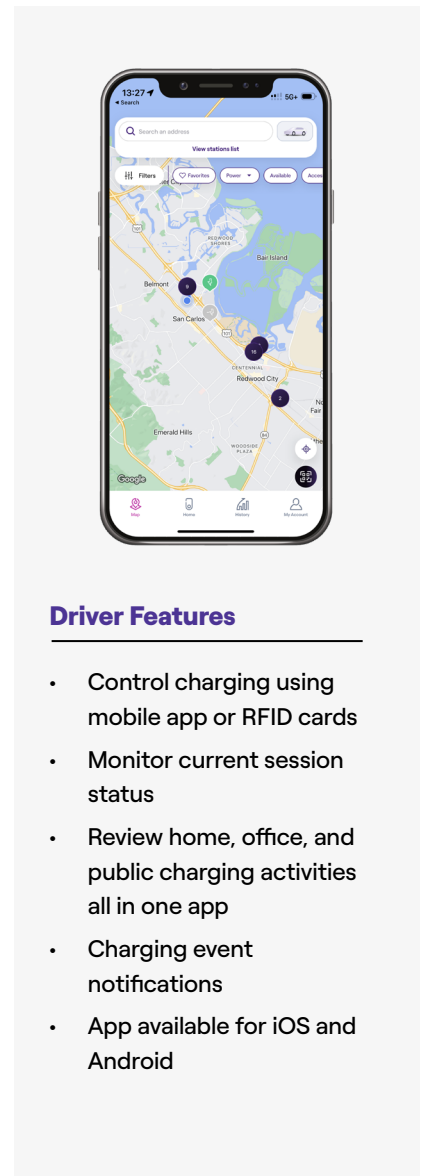

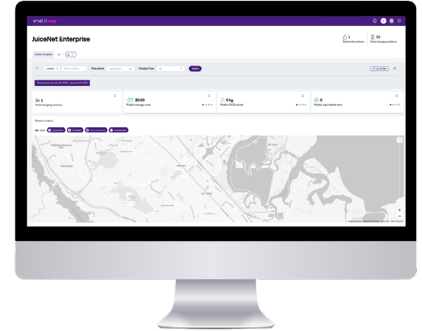

A powerful dashboard and robust reporting let you monitor charger and driver activity

Make Charging Easy

Simple app for drivers to control and monitor their charging

JuiceNet Enterprise Features

Charging Station Management	<ul style="list-style-type: none"> Advanced scheduling to reduce demand charges Scheduled access control Flexible power limitation configurations
Control Charging Schedules and Availability	<ul style="list-style-type: none"> Set charging station access hours individually for designated drivers and guests Set power availability schedules for weekdays and weekends or custom days to limit demand charges
Charger Access Control	<ul style="list-style-type: none"> Grant charging station access to authorized users only or authorized users and guests
Reports	<ul style="list-style-type: none"> Consumption reports by driver, RFID card, charging station, or location Monitor active charging sessions Run session history reports by station and user Export reports in PDF, XLS, CSV
Pricing and Payments	<ul style="list-style-type: none"> Set pricing by kWh, session, min, or any combination of the above Automated payment collection in-app via Stripe integration Generate usage report & export data for manual invoicing
Administrator Dashboard Access	<ul style="list-style-type: none"> Administrator access level control to devices Manage other administrators, authorized drivers and RFID cards View your station health status collectively in a simple map or list Advanced filtering and aggregation capabilities for data consumption Configurable energy costs to estimate revenue Tree/CO2 emission savings estimation Price management
Automated Load Balancing	<ul style="list-style-type: none"> Limit maximum power load for a group of chargers Schedule maximum power loads to reduce demand charges
OpenADR 2.0b Compliant	<ul style="list-style-type: none"> A smart grid standard used for Automated Demand Response programs
Troubleshooting Tools	<ul style="list-style-type: none"> Review individual states of the charging station: status, voltage, power, current View logs and events for each charging station Troubleshoot isolated session issues with isolated charging station states, State of Charge (SoC) *when available, end of session reason, and more pertinent information gathered for that session

Driver Features

- Control charging using mobile app or RFID cards
- Monitor current session status
- Review home, office, and public charging activities all in one app
- Charging event notifications
- App available for iOS and Android
