

2021 JUICEECO HISTORIC PRODUCT CONTENT LABEL¹

JuiceEco™ is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information, see www.green-e.org/rec.

JuiceEco is sold in blocks of 10,000, 15,000, and 20,000 miles driven over a 12-month period. On average, these blocks of miles correspond to 3,400, 5,100, and 6,800 kilowatt-hours (kWh), respectively. In 2021, JuiceEco was made up of the following renewable resources.

Green-e® Energy Certified New ² Renewables in JuiceEco		Generation Location
-Biomass		
-Geothermal		
-Hydroelectric ³		
-Solar		
-Wind	100%	Texas
TOTAL	100%	

1. These figures reflect the resource mix of RECs delivered to EnelX's JuiceEco customers in 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved for extended use by Green-e® Energy.”

3. Eligible hydroelectric facilities are defined in the Green-e® Renewable Energy Standard for Canada and the United States (<http://www.green-e.org/standard>) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org) or EcoLogo (www.ecologo.org); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying the USA includes: Coal (23.5%), Nuclear (19.7%), Petroleum (0.5%), Natural Gas (38.4%), Hydroelectric (6.6%), and Other (11.3%). This resource mix was prepared in accordance with U.S. EIA 2019 data.

The average home in the USA uses 914 kWh per month. Source: U.S. EIA, 2019.
